PROFESSIONAL SUMMARY

First Class Honours graduate in Information Technology and Business Information Systems, with data administration experience and over three years at British Airways, where I built a revenue tracker now used by agents across the office. SQL is my strongest skill, alongside Power BI and strong Excel. Seeking a junior data, reporting, MI or operations role.

SKILLS

Technical: SQL (SQL Server, PostgreSQL, MySQL; CTEs, window functions, joins), Power BI (Power Query, DAX, data modelling), Excel (Power Query, XLOOKUP, INDEX/MATCH, SUMIFS, COUNTIFS, conditional formatting, pivot tables), Tableau, Python (pandas, learning)

Reporting & Analysis: MI and performance reporting, KPI and target tracking, data entry, cleaning and validation, data modelling, dashboard development, anomaly detection, revenue analysis

Operations: Contact centre KPIs (AHT, targets), email and diary management, cross-team coordination, process improvement

Tools: Microsoft 365 (Excel, Outlook, Teams, Word, PowerPoint, SharePoint), Salesforce CRM, Amadeus, Figma, AI tools with output validation

PROJECTS

Self-directed projects. Code, dashboards and write-ups at ibomenobasiekanem.com.

Healthcare Claims Analysis | *SQL Server, window functions*

- Analysed 449 insurance claims and 1.55M paid: inpatient care is 22% of claims but 70% of spend. Used window functions to flag claims paid up to 14 times their procedure's average, and documented data quality issues.

Airline Departure Punctuality | *Power BI, Power Query, DAX*

- Built a star-schema Power BI report on 45,886 flights tracking on-time performance (78.2%) against an 80% target, and fixed a DAX error that counted unrecorded flights as on time.

Mobile Game Revenue & Customer Analysis | *Power BI, Power Query, DAX*

- Found twelvefold revenue growth came from more paying customers rather than higher spend, and caught errors that would have misstated revenue, including a currency column blank on 26% of rows.

WORK EXPERIENCE

Customer Service Advisor Apr 2023 – Present

British Airways, Manchester, UK | Gold Guest List and Premier team; previously Gold and Change Booking

- Built an Excel revenue tracker, now used by agents across the office, that tracks bookings, revenue and overtime against sales targets and automatically calculates overtime pay and commission, using SUMIFS, COUNTIFS and conditional formatting.
- Consistently meet and exceed monthly sales targets of £60K to £150K across flights, holidays and hotel bookings.
- Identified a system fault rebooking customers from cancelled flights onto much earlier or later flights instead of new ones at a similar time; presented the impact to management and secured a new free-rebooking policy.
- Handle 20 to 25 cases a day by phone and email, managing correspondence in Outlook and keeping account records accurate in Salesforce and Amadeus, while beating average handle time targets.
- Coordinate with airport, fares, ticketing and refunds teams on complex cases, use SharePoint for organisational resources, and trained colleagues on booking systems.

Data Administrator Feb 2022 – Aug 2022

FZX Media Consortium, Nigeria

- Entered and maintained data in Excel, and organised files so records were accurate, consistent and easy to find.

Personal Assistant to the Head of Service May 2021 – Jan 2022

Office of the Head of Service, Cross River State Government, Nigeria

- Managed a senior government official's calendar, arranged meetings, and organised files and records.

EDUCATION

BSc (Hons) Information Technology and Business Information Systems, First Class 2021

Middlesex University
